TO ARCHITECTS, SCULPTORS, BUILDERS, STONE and MARBLE MASONS, &c. &c.—ALABASTER QUARRIES, CHELLASTON, near DERBY.—Alabaster in blocks of almost any size, and of very superior quality, may now be obtained from these quarries on application to

Messrs. JOSEPH SMITH and SONS, HORNINGLOW, near BURTON-on-TRENT.

This stone was extensively used during the Middle Ages at Monuments and other Ecclesiastical Edifices, and since that period until now has not been obtained in blocks of any size. Its colour is white, and it is readily worked. It is very veined, and capable of taking a high polish, which renders it suitable for every kind of internal House Decoration.

Agent in London, Mr. WILLIAM FIELD, 33, Holywell-street, Millbank; Depôt, 32, Wharf, Paddington, where a stock is always on hand.

FIRE-PROOF CONSTRUCTION.—FOX and BARRETT'S PATENT.—The great importance of fire-proof construction is shown by the numerous partial conflagrations in London during the past year, by which a considerable increase of insurance is occasioned with fire-proof yards, the premium very naturally exceeding 1 per cent. on goods of these yards.

This result is also shown in a return of fires to the Fire Brigade authority, THAT NO BUILDING IN WHICH FOX and BARRETT'S PATENT CONCRETE FLOORS AND JOISTS ARE USED IS PRACTICALLY EXPOSED FROM THE DANGER OF FIRE; and when to this fact it is added that timber is also liable to dry-rot and the ravages of the [illegible] termite, for which it affords a speedy remedy, the combined advantages from its use must be very great.

It is proved, from the experience of persons who are interested in building, to inquire whether considerable economy in the cost of construction cannot be substituted for timber in the construction of floors, &c. without involving additional cost; and attention is invited to a number of cases in which, during the past year, fire-proof floors, of various types (the use of which is protected by Fox and Barrett's patent), are established for the Admiralty, together with a great variety of private properties, adapted to resolve a finished surface of floor or roof of any kind.

Among the buildings at present in progress in London on this system is the new CUSTOM HOUSE, of extensive range, affording accommodation for the additional bonds: and for buildings of this description and importance, as well as for PRIVATE DWELLING-HOUSES, OFFICES, WAREHOUSES, &c. it possesses very great advantages.

A detailed description of the system, estimates, and all further information, may be obtained on application to the Proprietors of the patent.

Mr. BARRETT, late Fox and Barrett, 12, York-buildings, Adelphi,
